Variable annuities are appropriate for long-term investing and designed for retirement purposes. Investment return and principal value of an investment will fluctuate so that an investor's unit values, when redeemed, may be worth more or less than their original cost. Withdrawals or surrenders may be subject to contingent deferred sales charges (CDSC). Withdrawals and distributions of taxable amounts are subject to ordinary income tax and, if made prior to age 59½, may be subject to an additional 10% federal income tax penalty. Withdrawals, for tax purposes, are deemed to be gains out first. Withdrawals reduce the living benefit, death benefit and account value.

All guarantees, including optional benefits, are backed by the claims-paying ability of the issuing company and do not apply to the underlying investment options.

Annuity contracts contain exclusions, limitations, reductions of benefits and terms for keeping them in force. Your licensed financial professional can provide you with costs and complete details. All products and features may not be available in all states.

Optional living and death benefits may not be available in every state and may not be elected in conjunction with certain optional benefits. Optional benefits have certain investment, holding period, liquidity, and withdrawal limitations and restrictions. The benefit fees are in addition to fees and charges associated with the basic annuity. Please see the prospectus for more information.

Your needs and the suitability of an annuity product should be carefully considered before investing. When evaluating your needs, please consider other variable annuities available from Prudential Financial companies.
