80 MILLION AMERICANS HAVE PENSIONS. BUT THEY AFFECT 300 MILLION OF US.

When pensions are at risk, the economy is at risk. And today, too many corporate pension plans are underfunded or underperforming. But what if these companies didn’t have to decide between funding their pensions and funding their growth? What if millions of workers didn’t have to worry about their future pension checks?

At Prudential, we’re using 135 years of experience in investment and risk management to create sound ways to de-risk pension plans, or even transfer pension risk permanently to us. This is a big, important challenge that affects us all. But together, THIS IS A CHALLENGE WE CAN MEET.
